# ZEROTIER

Enterprise Networking

ZeroTier's enterprise-grade network platform is the **simpler**, **safer**, and **stronger** way to connect devices and people at unlimited scale. Global private networks are truly possible with ZeroTier.

| Completely Centralized Networks | Unlimited Scale SD-WAN | Defense-Grade Cryptography | Fast & Standards Compliant |

IoT & Edge Computing

Utilized by IoT and Edge Computing providers to enable secure, low-latency communication across disparate network environments. ZeroTier reduces complexity by ensuring seamless data flow between edge devices and hybrid/multi-cloud resources.

- Seamless peer-to-peer device communication across distributed environments.
- Low-latency performance for real-time data processing at the edge.
- Low-bandwidth mode for reduced data consumption for wirelessly connected devices.
- Usage management tools for data consumption.
- End-to-end encryption for secure IoT and edge deployments.
- Simple setup for rapid deployment.
- Supported by top IoT router providers including Teltonika, Inhand Networks, MikroTik, and more.
